

ART, B.F.A.

Mission

The Department of Art is a vibrant community of artists and scholars who integrate faith and creative practice. Through an innovative and rigorous curriculum, we cultivate a student's ability to create and critically evaluate complex works of art in a mentoring environment. We foster curiosity through established and experimental mediums, methods, and theoretical perspectives.

Degree Program

A Bachelor of Fine Arts degree in Art (<https://www.biola.edu/degrees/u/art-bfa/>) (B.F.A., formerly Studio Art, B.F.A.) is offered upon completion of the University baccalaureate and the art major in one of the following concentrations: animation, design, illustration, painting, photography, sculpture and interdisciplinary. The professional degree program requires students to complete 69-72 credits in art, preparing them for graduate studies and professional art practices.

Learning Outcomes

Program Learning Outcomes

Upon completion of the Bachelor of Fine Arts in Art, students will be able to:

1. Conceive, design and create works of art in one or more specific fine arts fields that are technically and conceptually sophisticated (ULO 1).
2. Recognize, analyze, compare and evaluate historical and contemporary art movements and aesthetic philosophies, including both Western and Global material (ULO 1).
3. Recognize and identify a variety of professional practices, career/employment and graduate education opportunities and apply that knowledge by developing a personalized career plan (ULO 3).
4. Articulate a clear rationale for the production and evaluation of contemporary visual art that reflects an orthodox Christian value system (ULO 2).

Each Program Learning Outcome (PLO) listed above references at least one of the University Learning Outcomes (ULO 1, 2, 3), which may be found in the General Information (<http://catalog.biola.edu/general-information/>) section of this catalog.

Requirements

Admissions and Program Requirements

The Department of Art has an open admissions policy. Incoming first-year students and transfer students from other institutions may declare an art major when they apply for admission to Biola University. Because of the rigorous schedule and amount of work required in the B.F.A. degree program, transfer students and Torrey Honors College students may need an additional semester to complete all of their requirements.

The Department of Art offers three degree programs. The Bachelor of Fine Arts in Art is a professional degree program focusing on intensive studio practice and requiring an area of concentration; the B.F.A. is the preferred degree for students who anticipate having an art-related career, or who are planning to attend graduate school. The Bachelor of Science degrees in Art and in Design contain a broader range of liberal arts

general education courses, and allow students the option of choosing a wide range of general electives. The two B.S. degrees also allow greater flexibility for students completing a double major or a minor in another academic discipline.

Every year, all art majors participate in formal reviews to evaluate their progress in the department. Student portfolios are appraised using a variety of criteria, such as technical achievement, creative problem solving, and aesthetic/artistic development. Reviews are conducted at the end of the freshman, sophomore and junior years. Graduating seniors in the B.F.A. program are evaluated the semester before their thesis exhibitions.

All art majors are required to maintain a 2.5 GPA in the program. Any grade below a "C-" (1.67) must be repeated.

In art and design studio classes, contact hours define the meaning of a credit hour. In these courses, one semester hour of credit equals two hours of class instruction with at least one additional hour of unsupervised laboratory work each week. Studio courses receiving three credits typically meet six hours a week for class instruction with the expectation that students complete an additional three hours of assigned laboratory work. Students taking ARTS 462 or ARTS 464, and independent studies, must complete a minimum of three hours of research/laboratory work each week during the semester for one hour of credit.

All B.F.A. majors must declare an area of concentration before registering for the sophomore year. Students declaring the Interdisciplinary Concentration must choose two specific areas of concentration (animation, design, illustration, painting, photography, or sculpture).

It is recommended that all Art majors own a Macintosh laptop. Contact the Department of Art office for recommended specifications.

Concentrations

The BFA major is designed to give art students flexibility in constructing their program which will include one of seven areas of concentration.

The **Animation Concentration** focuses on equipping students with central skills in the discipline of animation to prepare them for professional outcomes in the entertainment industry. Note: Students were accepted into this concentration beginning Fall 2022.

The **Design Concentration** integrates a fine arts perspective into a curriculum that promotes conceptual thinking and transdisciplinary investigation while developing technical proficiencies to engage a contemporary practice.

The **Illustration Concentration** develops students' proficiencies in commercial applications of drawing, painting, and digital forms, as a means to prepare them for professional outcomes in various industries. Note: Students were accepted into this concentration beginning Fall 2022.

The **Painting Concentration** focuses on a wide range of painting practices including observational representation, figuration, and abstraction while engaging students in current discourses within the discipline.

The **Photography Concentration** focuses on integrating the skills of black and white darkroom techniques with contemporary digital color practices to produce conceptually-driven, photo-based art. **As of Spring 2023, this**

concentration is in teach-out phase; it is not open to new or readmit students.

The **Sculpture Concentration** equips students to think creatively while developing proficiency in a variety of three-dimensional fabrication techniques — including additive and subtractive processes, modeling, carving, mold-making and casting.

The **Interdisciplinary Concentration** allows students to develop their interests in two of the above concentrations by combining key courses from each into a focused interdisciplinary concentration.

Course Sequence

NOTE: The course sequence table is designed by the major department and is one way that the classes will work out properly in sequence for your major. However, there are alternative or flexible ways to rotate some of the classes within the same year/level and sometimes between year levels. Please contact your major department advisor to discuss flexible alternatives in scheduling the sequence of your classes.

Taking coursework during the summer session may also be an option to accelerate your degree path.

See Core Curriculum Program section (<http://catalog.biola.edu/general-information/undergraduate-core-curriculum-program/>) for a list of approved Core Curriculum courses.

NOTE: The course sequence table is designed by the major department and is one way that the classes will work out properly in sequence for your major. However, there are alternative or flexible ways to rotate some of the classes within the same year/level and sometimes between year

levels. Please contact your major department advisor to discuss flexible alternatives in scheduling the sequence of your classes.

Taking coursework during the summer session may also be an option to accelerate your degree path.

See Core Curriculum Program section (<http://catalog.biola.edu/general-information/undergraduate-core-curriculum-program/>) for a list of approved Core Curriculum courses.
